EDRS PRICE	Document Not Available from EDRS.
DESCRIPTORS	Climate Change; Conservation Education; *Earth Science; Elementary Secondary Education; Hurricanes; Meteorology; Science Activities; Teaching Guides; Videotape Recordings; *Weather

ABSTRACT

In this videotape recording, students learn about the layers of the atmosphere and why each is important to the survival of life on the planet. Students discover why the atmosphere is responsible for weather and see how special aircraft actually fly into hurricanes. Students build their own working barometer in a hands-on activity. Contents include a teacher's guide designed to help science teachers in grades 5-8 by providing a brief synopsis of the program, pre-viewing and follow-up questions, activities, vocabulary, and additional resources.
